Dear Students,

As we approach the completion of PRPE29 – Precision Engineering, you are required to complete an individual assignment and submit it through the Google Form provided below, which will also collect your end-of-course feedback.

1. **Assignment Requirements Each student must select ONE precision manufacturing process or precision measurement technique and prepare a technical report covering:**
    a. Introduction, significance and applications.
    b. Working principle and major components.
    c. Special features, advantages and limitations.
    d. Recent advancements, special attachments and hybrid variants, wherever applicable.
    e. TWO distinct case studies, describing their applications, methodologies, key findings and outcomes.
    f. References following the IEEE numbered citation style.

    Case Study Selection: The two case studies within an assignment must be distinct. Repetition of case studies across different students is strongly discouraged. Students are encouraged to explore unique applications beyond those discussed in class.

2. **Formatting and Academic Integrity Minimum length:**
    a. 4 pages, including figures and tables.
    b. Font: Times New Roman, 12 pt.
    c. Line spacing: Single.
    d. References: IEEE numbered style.
    e. Turnitin limits: Less than 10% similarity and less than 10% AI-generated content. Submissions will be screened and evaluated accordingly.

3. **Figures, Tables and Copyright Permissions**
    For reproduced figures and tables, obtain the necessary copyright permissions and acknowledge the sources in the respective captions using wording such as:
    "Reproduced with permission from the publisher [citation]."
    For materials reproduced from open-access sources, indicate the applicable Creative Commons license (e.g., CC BY 4.0) and provide the complete citation. Ensure compliance with the relevant license conditions.

4. **Submission Requirements**
    Upload the following documents in PDF format:
    a. Assignment report: RollNumber_PRPE29_Assignment.pdf
    b. Copyright permission documents (where applicable): RollNumber_PRPE29_CopyrightPermission_01.pdf, RollNumber_PRPE29_CopyrightPermission_02.pdf, etc.

5. **Google Form – Course Feedback and Assignment Submission**
    The Google Form consists of two sections
    a. Section 1: End-of-course student feedback on teaching, course content, learning resources and assessments.
    b. Section 2: Assignment report and copyright permission document uploads.

    Please complete both sections before submitting the form. Your constructive feedback will help improve future offerings of the course and will not affect your academic grades.

    Google Form: https://forms.gle/sb5oaie7x7n9zG9V8

    Submission Deadline: 23 October 2026 (Friday).

6. **Kindly adhere to the instructions and ensure timely submission.**
